                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              US-10-798-721-29

1 Sequence 29, Application US/10798721

2 Sequence 29, Application US/10798721

3 Sequence 29, Application US/10798721

3 EDBEAL INFORMATION:

4 APPLICANT: Walke, D. Wade

7 TITLE OF INVENTION: Novel Human Membrane Proteins and Polynucleotides Encoding the CURRENT APPLICANTION NUMBER: US/10/798,721

5 CURRENT APPLICATION NUMBER: US/09/969,532

7 TITLE OF INVENTION NUMBER: US/09/969,532

7 PRIOR APPLICATION NUMBER: US/09/969,532

7 PRIOR FILING DATE: 2001-10-02

ECONOMY, Trade and Industry of Japan; CDNA full insert sequencing:

Research Association for Biotechnology (RAB); cDNA library

Construction: Helix Research Institute (HRI) (supported by Japan

Key Technology Center etc.); 5- & 3'-end one pass sequencing:

HRI, and Biotechnology Center, National Institute of Technology and

Evaluation; clone selection for full insert sequencing: RAB;

RAB; annotation: HRI and RAB.
